PIRANHA

ADD BITE TO YOUR BOTTOM LINE

MODEL **RSBF04**

Turn your grinder's bone collection material into quality ground meat.

Tear into ground meat waste and boost profits with the Piranha.

The Piranha is a revolutionary machine designed to do one thing with ruthless efficiency — extract ground meat from your grinder's bone collector materials. The Piranha efficiently filters the bone from the meat, eliminating unnecessary waste while delivering extra product that would otherwise be discarded. Since nearly all of what comes out of your grinder's bone collector is actually good meat and not bone, the Piranha can quickly pay for itself. The Piranha can turn 90- 97% of your bone collection material into high-quality ground meat. By eliminating a large percentage of waste, the Piranha delivers incredible value because less waste translates into more profits.
