

BEEHIVE S-SERIES

The Beehive® S-Series rotary separator produces higher yields

For production of superior meat quality for human and pet food.

- High-speed separation leads to reduced temperature rise on end product
- Robust construction with simple design for lower maintenance costs

The **simple and hygienic** design helps eliminate sources of contamination and allows for easy sanitation.

APPLICATION:

- Chicken
- Turkey
- Pork
- Beef
- Fish
- Lamb
- Kangaroo

Lowest cost maintenance per pound/kg

THE BEEHIVE® S20/S90

With its modular design, allowing for custom elevations, the inlet and outlet directions are **entirely customizable** to meet specific production needs.

- Independent pump from separation head
- Pressure control between pump and separation head
- Lobe pump: Theoretical maintenance free design, preserving structure
- Pallet pump: Lower cost of purchase
- Very high yield in pet food not achievable with other technologies
- Ceramic parts for extremely low maintenance cost
- Separating screw with 2 bearings
- Feeding possible with a grinder or a pump
- Directly feeding in the head of the machine, no roll back

Machine	Application	End product	Capacity	Specification
S20 A	Poultry, Fish	Human Food	up to 35,000 pounds / 16 t per hour	Direct drive High infeed rate
S20 P	Poultry, Fish	Pet Food	up to 35,000 pounds / 16 t per hour	Direct drive High infeed rate
S90 C	Pork, Beef, Lamb, Kangaroo	Pet Food	up to 13,000 pounds / 6 t per hour	Belt driven Higher tork More robust
